

CLEAN WATER SRF:	POINTS	LOW	MEDIUM	HIGH
Green 212/Stormwater Ranking:				
Capability to Manage the Project	10	0-3	4-6	7-10
Governor's Task Force Priorities	10	0-3	4-6	7-10
GPR Benefits	40	0-10	11-20	21-40
CWSRF 212/Stormwater Priorities	40	0-13	14-27	28-40
Green 319 Ranking:				
Capability to Manage the Project	10	0-3	4-6	7-10
GPR Benefits	40	0-10	11-20	21-40
319 Priorities	50	0-16	17-33	34-50
DRINKING WATER SRF:				
Capability to Manage the Project	10	0-3	4-6	7-10
Governor's Task Force Priorities	5	0-1	2-3	4-5
GPR Benefits	40	0-10	11-20	21-40
DWSRF Priorities	40	0-13	14-27	28-40
State Water Plan	5	0-1	2-3	4-5
CLEAN WATER SRF:				
Capability (10%: 212 & 319)				
Applicant has demonstrated capability to satisfy federal requirements (like Davis Bacon, DBE, Buy American, and environmental review)				
Applicant has a strong local commitment to project success in the form of local financing or unfunded staff time				
Governor's Task Force Priorities (10%: 212)				
Incorporates priorities identified in the Sustainable Water Infrastructure Task Force Report (improved management, consolidation, maximization of non-structural solutions)				
Section 319 Priorities (50%: 319)				
Project will implement a key objective that is highlighted in Pennsylvania's NPS Management Plan for implementation over the next 3 years				
Project will implement work identified in a Watershed Implementation Plan (WIP) accepted by USEPA				
Project will implement work that will improve or enhance water quality				
Project once implemented will help restore water quality from a non-point source impairment located on an impaired stream identified in the 2008 PA Integrated Water Quality Monitoring and Assessment Report or protect water quality through a watershed protection plan.				
GPR Benefits (40%: 212 & 319)				
Clean Water SRF Priorities (40%: 212)				
Public Health				
Aquatic Health				
Infrastructure Health				
Compliance				
Community Health				
Clean Water SRF Priorities (40%: Stormwater)				
Public Health and Safety				
Environmental Impacts				
Compliance				
Adequacy, Efficiency, and Social				
DRINKING WATER SRF:				
Capability to Manage the Project (10%)				
Applicant has demonstrated capability to satisfy federal requirements (like Davis Bacon, DBE, Buy American, and environmental review)				
Applicant has a strong local commitment to project success in the form of local financing or unfunded staff time				
Governor's Task Force Priorities (5%)				

	Incorporates priorities identified in the Sustainable Water Infrastructure Task Force Report (improved management, consolidation, maximization of non-structural solutions)				
	GPR Benefits:				
	Water Efficiency				
	Energy Efficiency				
	Green Infrastructure				
	Environmental Innovation				
	<u>DRINKING WATER SRF (continued):</u>				
	Drinking Water SRF Priorities (40%)				
	Public Health				
	Compliance				
	Env and Social Impacts				
	Adequacy and Efficiency				
	Public Safety				
	State Water Plan (5%)				
	Advances Priorities and Recommendations identified in the SWP related to Water Supply and Assessments (utilize public water supply metering, implement water loss control methods, revise operational protocols, employ conjunctive management techniques, restore watershed integrity, replace portable water use, mitigate consumptive water use, expand water systems, recharge groundwater, expand treatment capacity, increase withdrawals from existing sources, increase raw water storage, develop additional water sources)
